**SARASOTA VASCULAR SPECIALISTS**  
*The Vein & Artery Experts*

**A**ccording to the Society for Vascular Surgery, "Healthy arteries and veins are a matter of life and limb." That is why we hope you will entrust your patients' vascular health to the Vein and Artery Experts at Sarasota Vascular Specialists, the only medical practice in the tri-county area dedicated to the treatment of patients with disorders of the veins and arteries.

Unlike other physicians, we are uniquely trained and experienced to know how, and when, ALL forms of diagnosis and therapy should be performed. This includes not only advanced surgical bypass operations, but also medications, minimally invasive endovascular procedures such as balloon angioplasty, atherectomy and stents of all vascular beds including leg, renal and carotid arteries. Our in-depth experience separates us from some interventionalists who are only able to perform balloons or stents, and may be unable to manage the complications of these procedures.

Drs. Samson, Showalter, Lepore and Nair are internationally renowned vascular specialists having published over 85 peer reviewed scientific publications and 20 textbook chapters. They have presented their combined knowledge at hundreds of scientific meetings locally, nationally and internationally. They are also recognized thought leaders in the medical management of vascular disorders and have pioneered outpatient injection and laser sclerotherapy of varicose and spider veins. Our physicians are supported by a highly trained staff of professionals that includes Physician Assistant Ricardo Morales who has served as the Vice President of the Florida Physician Assistant Society.

### ICAVL-ACCREDITED VASCULAR DIAGNOSTIC CENTER

We are proud to offer one of the first all-encompassing vascular diagnostic centers in the United States. This Center provides state-of-the-art noninvasive vascular diagnosis, including vascular ultrasound and physiologic/hemodynamic studies.

The doctors and staff of Sarasota Vascular Specialists.

Our Vascular Laboratory, featured as the gold-standard facility by ABC Television's Prime Time when it evaluated vascular labs in Florida, was the first lab in Sarasota County to be certified by the Intersocietal Commission for the Accreditation of Vascular Laboratories (ICAVL), and all eight of our sonographers are Registered Vascular Technologists.

Unique to our center is our ability to offer 64-slice spiral CT angiography and MRA imaging of the arteries and veins. We also have a dedicated Philips X-ray suite, which allows us to perform diagnostic arteriography and the full range of balloon outpatient angioplasty and stenting.

Your patients will appreciate the ease of having all their tests done in one conveniently located, patient-friendly environment.
